SUMMARY

Mechanical engineer with expertise in managing mechanical installations, operations, & Maintenance activities in projects, enhancing efficiency through innovative solutions and quality standards. Developed strong client relationships and implemented training programs to boost team performance. Skilled in logistics and resource allocation, optimizing workflow to meet project deadlines. Committed to continuous improvement through effective leadership and mentoring.

EXPERIENCE

06/2017 to Current ***Deputy Manager – Business Support & Contracts Administration***
VENTURE GULF ENGINEERING WLL*- Doha, Qatar.*

- Assist in repairs and maintenance of electric motors, pumps, and rotating equipment.
- Directed operational workflows to enhance efficiency and streamline processes across multiple departments.
- Guided cross-functional teams in implementing best practices for project management and operational execution.
- Developed and monitored key performance indicators to assess operational effectiveness and drive continuous improvement.
- Collaborated with senior management to strategies and align operational priorities with organizational goals.
- Facilitated training programs for staff to elevate skill levels and promote adherence to safety and quality standards.
- Managed supplier relationships to negotiate contracts and optimize procurement processes for operational needs.
- Analyzed operational data to identify trends, inform decision-making, and enhance overall service delivery.
- Generated weekly reports to communicate targets and ensure activities were on track to meet goals.
- Managed day-to-day operations, facilitating smooth workflow and optimizing staff productivity.
- Aid in machine shop fabrication and logistics support for oil & gas clients. Oversee assembly, testing, and inspections to ensure standards compliance.
- Manage personnel and resources to streamline workflow and control costs. Ensure timely project delivery and adherence to safety regulations.
- Conduct quality inspections and apply new technologies for improvements.
- Encourage team development and stay updated with industry trends.

07/2000 to 06/2007 ***Superintendent – Mechanical at***
MANWEIR WLL - Doha, Qatar.

- Assisted in directing mechanical department operations, focusing on repairs and overhauls of valves and rotating equipment.
- Supported field services through manpower planning, employee contracts, and performance reviews to enhance operational efficiency.
- Aided in budgeting, inventory management, training, operating plans, and client quotations to achieve business targets.
- Utilized ERP (Oracle) and Microsoft Office platforms to administer projects and workflows effectively.
- Collaborated closely with clients to provide tailored solutions and ensure compliance with project requirements.
- Managed installations and commissioning of CNC machines, curing/burn-off ovens, VPI tanks, motor/rotor test centers, load banks, torque machines, Calder testers, and hydraulic presses.
- Contributed to project management leadership with an emphasis on productivity, safety, and continuous improvement.
- Utilised ERP (Oracle) and Microsoft Office platforms to administer projects and workflows effectively.
- Collaborated closely with clients to provide tailored solutions and ensure compliance with project requirements.
- Managed installations and commissioning of CNC machines, curing/burn- off ovens, VPI tanks, motor/rotor test centres, load banks, torque machines, Colder testers, and hydraulic presses.
- Contributed to project management leadership with an emphasis on productivity, safety, and continuous improvement.

06/2007 to 06/2010 ***Senior Engineer – Projects at***
BAHWAN ENGINEERING COMPANY, Muscat, Oman.

- Assisted in operations and maintenance of gas turbines, desalination equipment, and fertiliser plant systems to ensure reliability and efficiency.
- Facilitated management of contracts with the Royal Navy of Oman at Sultan Bin Said Naval Base.
- Supported enhancement of operational performance through effective equipment upkeep.
- Facilitated regular project meetings, ensuring clear communication among team members and addressing any issues that arose.
- Mentored junior engineers, providing guidance on best practices and fostering a culture of continuous improvement within the team.
- Conducted thorough risk assessments to identify potential challenges, proactively formulating strategies to mitigate project risks.
- Developed and implemented project schedules, effectively coordinating resources and timelines to meet project objectives.
- Directed multidisciplinary teams in executing complex engineering projects, ensuring high standards of quality and compliance.

- Analysed system failures and implemented corrective actions to prevent recurrence, enhancing system robustness.
- Monitored project progress against timelines and budgets, making adjustments as necessary to meet key milestones.
- Identified opportunities for process improvements and led initiatives to enhance operational efficiency.

09/2000 to 07/2007 ***Senior Rotating Equipment Technician***
SALINE WATER CONVERSION CORPORATION - JEDDAH, SAUDI ARABIA.

- Managed maintenance of 5 x 82 MW and 5 x 100 MW thermal power units and a 75 MGPD desalination plant at SWCC Shuaiba. Performed maintenance and overhauls on pumps (boiler feed.
- condensate, brine recycle, saline water treatment, cooling water, chemical dosing).
- Conducted reassembly, alignment, and system normalization of pumps and motors.
- Dismantled, overhauled, and repackaged high-pressure/temperature valves (gate, globe, plug, ball, needle, steam stop, isolation, control, regulator, and diaphragm).
- Overhauled single- and multi-stage compressors, including spare part replacement, reconditioning, and performance testing.
- Maintained swiveling, lifting, and traction mechanisms to ensure reliability and operational efficiency.
- Managed comprehensive maintenance programs for rotating equipment, enhancing operational reliability and efficiency across facilities. Conducted detailed inspections and assessments of rotating machinery, identifying issues and recommending preventative measures to mitigate risks.
- Developed and implemented standard operating procedures for maintenance activities, fostering compliance with industry best practices and safety regulations.
- Mentored junior technicians, providing training on rotating equipment maintenance and troubleshooting techniques to enhance team capabilities.
- Collaborated with cross-functional teams to integrate rotating equipment solutions into projects, ensuring alignment with organisational objectives and timelines.
- Analysed equipment performance data to identify trends and areas for improvement, contributing to strategic decision-making processes.
- Facilitated root cause analysis for equipment failures, implementing corrective actions that reduced downtime and improved system performance.

03/1993 to 08/2000 ***Senior Mechanical Engineer at***
BHORUKA POWER CORPORATION LTD - BANGALORE, INDIA.

- Directed EPC and maintenance of hydro turbines, covering planning. erection, commissioning, operation, and stores management.
- • Successfully led the erection and commissioning of 2 x 9 MW vertical Kaplan turbines and 5 x 1.5 MW horizontal Francis turbines.

- Certified ISO 9000 auditor, ensuring compliance with quality standards across projects.
- Managed procurement of mechanical equipment, reviewed
- designs/drawings/calculations, and prepared material inventories for power plant construction and erection.
- Oversaw maintenance contracts, prequalification, inspections, and project monitoring.
- Directed commissioning and testing of utilities, prepared scopes of work, and coordinated procurement of spares and materials.
- Participated in tendering processes, including evaluation, negotiation, and contract awards.
- Coordinated erection, maintenance, and overhaul operations across multiple project sites in India.
- Mentored junior engineers, guiding design principles and project management best practices to foster professional growth.

CERTIFICATIONS

- Certified ISO 9000 Auditor, QAS, Bangalore
- ELTS, 6.5, 2005-07-01, British Council, Saudi Arabia

EDUCATION

06/1990 **Diploma in Mechanical Engineering**
Board of Technical Education, Government of India - Hassan, India
Website https://www.aicte-india.org/education/institutions/Board-of-Technical- Education

Statement of Comparability – Germany; KMK Germany - Berlin, Germany
Website https://zab.kmk.org/

SKILLS

- Operate hydraulic machinery controls
- Engineering principles
- Renewable energy
- Technical drawings
- Strategic planning
- Corporate social responsibility
- Contract law
- Operations management·
- Project management.
- Business management
- Principles of communication Train employees
- Negotiate with stakeholders
- Commission set construction Liaise with managers
- Write work-related reports
- Work safely with machines.
- Leading and motivating
- Making decisions
- Recruiting and hiring
- Organizing, planning and scheduling work and activities Management skills
- Developing objectives and strategies
- Supervising people
- Allocating and controlling
- resources
- Hire new personnel
- Prioritize tasks
- Use online communication tools
- Accept own accountability
- Provide leadership
- Resolve equipment malfunctions.
- Plan self-organization
- Design utility equipment
- Draft project documentation
- Adhere to organisational guidelines
- Follow company standards
- Monitor utility equipment
- Perform maintenance on installed Equipment
- Equipment maintenance
- Quality inspections
- Client relationship management
- Team leadership

- Monitor utility equipment
- Perform maintenance on installed equipment
- Track key performance indicators
- Work safely with mobile electrical systems under supervision
- Control of expenses
- Operate steam turbine
- Equipment maintenance
- Quality inspections
- Client relationship management
- Team leadership
- Continuous improvement
- Performance assessment
- Logistics coordination
- Knowledge of quality standards Customer Service
- Leadership skills
- Operate automated process
- Creative thinking
- Time-management control

HOBBIES AND INTERESTS

- Listening to World Music
- Driving Long distances with family
- WATCHING HUMOROUS PROGRAMS ON TV
- POETRY

LANGUAGES

English: C1 Advanced

German: A1 Beginner

DRIVING LICENCE

- Category B auto

With over 30 years of experience in industrial plants, maintenance, and engineering operations, the CV includes detailed project and role descriptions to ensure that recruiters and technical evaluators can clearly understand the scope of responsibilities and expertise developed over the years.

I look forward to the opportunity to contribute my experience and technical expertise to a progressive organization.

Best Regards,

Ravi Shankar MG
